Orange STUDIO

Analysis for better decisions. Innovation to move forward.

Service overview [OAR]

Opportunity Analysis & Roadmap

We identify what's holding your business back and where it can improve. You get an analysis of the problem and a plan for what to change first.

View service

WHO IT'S FOR

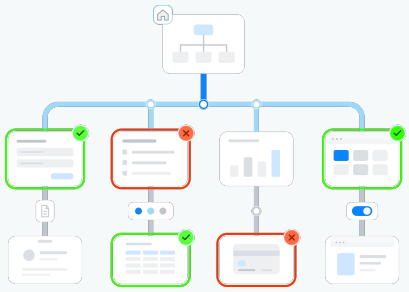
For executives and leaders in Operations, Finance, Sales or Technology who need to agree on what to address before investing.

WHAT WE ANALYZE

We follow the work end to end: people, steps, systems and data. We compare what's reported with what actually happens.

WHAT WE MAY FIND

- Work stalls between teams
- Systems don't share data
- Customers or teams can't move forward
- Each location operates differently
- There's data, but no clear answers
- Everything competes for priority



Example of a workflow we might analyze

WHAT YOU GET

Process map and diagnosis

How the process works today, where it gets stuck and what that affects.

Opportunities and future state

Which changes to prioritize and how the process could work after those changes.

Roadmap

What to test first, how to tell if it works and what can wait.

SCOPE AND ESTIMATED TIMELINE

Focused
3 to 4 weeks
One specific process.

Strategic
4 to 6 weeks
Several connected processes.

Comprehensive
6 to 10 weeks or more
Problems that need a phased plan.

OAR is a standalone engagement. Your team decides who implements the changes.

Let's talk about the challenge you want to solve
